STAY IN BOWLING

Kick-Off Meeting with Partners from Greece and Malta

We successfully held our kick-off meeting online with our esteemed partners from Greece and Malta. Here are the key points from the meeting:

- **Focus on Amateur Bowling Players:** It was decided to create tools and educational material primarily for amateur bowling players or those newly involved in the sport, rather than seasoned players.
- **Questionnaire Development:** To determine the MOOC lessons and educational material, a questionnaire was created and presented by the TEN-PIN team, in cooperation with the Aristotle University team.
- **Logo and Social Media:** AUTH presented two logo options, and after voting, the first one with pixelated bowling pins in blue was selected, with a request for a new version that includes a bowling ball.
